ERGOSAFE & INNOVATION

Innovation is essential to ErgoSafe. We have developed a completely new balustrade system adaptable for both ground-level and balcony installations. ClickitUp® by ErgoSafe is an innovative glass balustrade system offering multiple features that combine safety, design, and functionality into a sustainable concept for all types of outdoor environments.

SWEDISH & SUSTAINABLE

ErgoSafe, founded in 1996 in Halmstad, is a Swedish company with its own factory, ensuring high-quality glass balustrades crafted by our skilled team. We operate in highly modern facilities, utilize recyclable materials, and prioritize sustainable choices. Our goal is continuous improvement and a commitment to both the environment and people.

QUALITY & SAFETY

We highly value quality and safety. Our diverse product groups impose strict demands on us as a supplier. Demands we consider fundamental to meet and uphold on a daily basis. Our products undergo extensive testing and inspections to comply with legal requirements and product specifications.

Designed and manufactured in Sweden. ErgoSafe's glass balustrade marketed under the ClickitUp® brand is design protected through: EU 002416248-0001-0005 (March 2014), GB 90024162480001-0005, EU 015096653-0001-0002, GB, NO DM/2513503. The design protection means that no other party within the EU, the United Kingdom or Norway has the legal right to manufacture, sell or import copies of ErgoSafe's glass balustrades.

GLASS SOLUTIONS FOR NEW BUILDS AND WEATHER-EXPOSED OUTDOORS

We produce and deliver several variants of glass balustrades adapted to different types of outdoor environments. Whether for rooftop terraces, balconies, outdoor dining areas or private patios, we offer solutions that provide protection, enhance comfort and maximise every square metre.

With our glass balustrades, a rooftop terrace can for example be transformed into an attractive and wind-protected space for meetings and leisure. Combined with a pergola, our height-adjustable glass elements enable weather-protected enclosures all year round. We also offer windscreens and free-standing glass balustrades.

With extensive expertise in projects involving glass and aluminium, we are specialists in glass solutions for weather-exposed outdoor environments. We support the project throughout – from early concept stage to final installation.

ClickitUp, CiUFixed, CiUWindscreen, ClickitUpPlus, CiUFlex

Our products for outdoor environments where no risk of falling occurs

Our products offer

- + Multiple combinable variants
- + Increased comfort across seasons
- + Unified design and construction
- + Multiple door options
- + Designed with safety glass

ClickitUp is the original glass balustrade with a free glass edge and a height-adjustable function.

CiUFixed is a glass balustrade in the same design, consisting only of the fixed lower glass.

CiUWindscreen is a glass windscreen that provides wind protection in wind-exposed environments.

ClickitUpPlus is a height-adjustable glass partition consisting of a fixed lower and upper glass with a movable middle section.

CiUFlex is upgradeable to a height-adjustable system, allowing the movable part to be ordered at a later stage.

ClickitUpBalcony, CiUFixedBalcony, CiUFlexBalcony

Our products for outdoor environments where a risk of falling occurs

Our products offer

- + Designed in accordance with Eurocodes
- + Tested according to EN 12600
- + Designed with safety glass
- + Safe and elegant balcony environment
- + Unique design and construction

ClickitUpBalcony is specifically developed for installations where there is a risk of falling. It is height-adjustable, offers a high level of safety and a clean design, and is adapted for weather-exposed outdoor environments.

CiUFixedBalcony is a fixed glass balustrade that combines a high level of safety with a clean design. The solution is developed for installations where there is a risk of falling.

CiUFlexBalcony is a glass balustrade with an upgradeable construction, similar to CiUFlex. The system is designed to be ordered at different stages and by different stakeholders, providing increased flexibility over time.

FLEXIBLE DESIGN FOR ALL OUTDOOR ENVIRONMENTS

ErgoSafe offers several variants of glass balustrades that can be customized for both private and commercial environments. With various accessories, rooftop terraces, balconies, outdoor dining areas, and patios can be transformed into inviting spaces for socializing, recreation, and work.

MAXIMIZE THE BENEFIT OF OUTDOOR SPACES

For construction projects, our balustrade system is an ideal solution to maximize the functionality of outdoor environments and create an inspiring space where people thrive. By optimizing every square meter in a stylish and cost-effective way, our solutions contribute to increasing both the value and usability of outdoor spaces for the user, for example by enabling the maximization of seating capacity for a restaurant.

EXPERT SUPPORT FROM IDEA TO INSTALLATION

As experts in glass balustrades, we offer customized advice and support for every unique project. With our solid expertise in glass and aluminum, we help you choose the optimal solution and provide support throughout the entire design and installation process to ensure a result that meets your requirements and wishes.

QUALITY AND CERTIFIED SAFETY

ErgoSafe is a certified manufacturer according to EN 1090, ensuring high quality and safety at every stage. The components in our glass balustrade systems are designed to withstand extremely tough conditions. All our glass balustrades are tested at RISE, an independent certified testing institute, for various load tests as well as EN 12600 heavy impact testing.

WIND LOAD CALCULATIONS GUIDE

For projects with fall risk, we design according to the Eurocodes and local regulations. Wind load calculations are based on factors such as the geographical location, terrain type, and installation height, which determine the glass balustrade's section width and the required mounting details. Thanks to these calculations, we can recommend a safe and durable product for every unique project.

Our glass balustrade system consists of several models, developed to meet different needs in various types of outdoor environments. We produce glass balustrades in both standard and custom dimensions, and all models can be combined and adapted to suit the specific requirements of each project.

Below is an overview of our different models and accessories. With solid expertise and long experience in glass and aluminium, we support you in choosing the right solution and guide you through the entire process – from design and project planning to final installation.

Please feel free to contact us for advice and technical support. rådgivning och support!

Height-adjustable glass balustrades

With our height-adjustable glass balustrades, you get protection from the wind and can enjoy a longer outdoor season. Raise the wind protection while preserving the view.

Glass balustrades

Our Fixed models are stylish glass balustrades in standard height, meeting the requirements for safe installation. The fixed glass balustrades are easy to install and can be combined with our height-adjustable models.

Windscreen

A sleek windscreen that provides effective wind protection without compromising the view. The sections can be combined with our other models in the ClickitUp series.

Adjustable glass panel system

Together with a fixed roof, such as a pergola, and a pivot door, a stable and flexible glazing solution is created with complete weather protection all year round. The middle section is easily raised and lowered as needed.

Upgradeable glass balustrades

Innovative design that makes it possible to start with a glass balustrade with flex function and upgrade to a height-adjustable glass later.

Freestanding glass balustrades

Free Standing requires no ground anchoring. Combine a planter box or bench with any ground-level glass balustrade from our ClickitUp® system for a flexible solution that creates a functional and stylish outdoor environment.
